"In a sea of quantity, you'll find quality in Peter!"

"The conversation is not about just finding your next international role. It's about taking ownership of your personal narrative as the genesis of making the impact you were put on this planet to make."

-Peter Hill

Globally mobile business executives understand that getting to the next level of success requires the transformational exploration of what will make the rest of their career more purposeful in the work and meaningful for themselves. Peter believes in a methodology that starts with identifying the trail of crumbs that has been there in plain sight the entire time. It involves "running toward" not "running away" and clearing the way for one's innate wisdom shine through.

And what he's found is that—with the right mindset, processes, and effort—anyone can find themselves on the brink of massive breakthroughs in career happiness. What this looks like on a daily basis is the reduction of any inner tension about your career identity, and it means going to work every day with a spring in your step and a smile on your face.
